NAMAN BORDIA

Bengaluru, India | namanbordia@gmail.com | +91 9351061670 | LinkedIn | GitHub | Portfolio | LeetCode

EDUCATION

RV University, Bengaluru 2023 – 2027
B.Tech (Hons.), Computer Science and Engineering (AI & ML) | **CGPA: 8.93/10**

TECHNICAL SKILLS

Languages & Web: Python, Java, C++, JavaScript, SQL, C, HTML, CSS
Core CS: Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems, Computer Networks
Full-Stack & Engineering: React.js, Flask, REST APIs, MySQL, PostgreSQL, Git, Docker, testing, debugging, Agile
GenAI & ML: LangGraph, LangChain, RAG, semantic search, Pinecone, ChromaDB, BioBERT, scikit-learn

PROFESSIONAL EXPERIENCE

William O'Neil India Pvt. Ltd. Sep – Nov 2026
Software Development Intern | Bengaluru

- Extracted **textual and tabular data** from PDF documents and converted unstructured information into **structured, machine-readable JSON** for downstream data processing.

Governaice (UC Berkeley Startup) Jul – Nov 2025
Frontend Engineering Intern | Remote

- Developed reusable, responsive **React.js** components from Figma designs for a customer-facing web product, focusing on usability and maintainable frontend code.
- Collaborated with engineers through **Agile sprint planning and code reviews** to integrate UI components and improve application experience.

SELECTED PROJECTS

GhostMask – Privacy-Preserving GenAI Pipeline [GitHub] 2025

- Built a **six-node Python/LangGraph pipeline** for PII detection, secure tokenization, and contextual text reconstruction using **Presidio, spaCy NER, and Gemma 2B**.
- Implemented vault-based token mapping and a **Gradio interface** to inspect processing stages and support auditable LLM interactions.
- Leveraged **AI-assisted coding tools**(ChatGPT and GitHub Copilot) to support implementation and refinement of Python/LangGraph workflows.

Community Issue Reporting Platform [GitHub] 2025

- Engineered a **full-stack web application** with **React.js, Flask REST APIs, and MySQL** for issue reporting, tracking, assignment, and administrative workflows.
- Implemented **JWT authentication**, role-based access control, and **Leaflet map dashboards** to visualize and manage issues.

ChatGuard IDS – Secure Chat and ML-Based Threat Detection [GitHub] 2025

- Built a **TCP client-server system** with **AES-256-GCM encryption**, PBKDF2 authentication, access controls, and security logging.
- Applied **TF-IDF, Logistic Regression, Random Forest, and Isolation Forest** to flag spam, phishing, and anomalous client behavior.

PUBLICATIONS & RESEARCH

PhysioRAG – Evidence-Based Physiotherapy Conversational AI IEEE SSD 2026

- Developed a **citation-grounded RAG system** using LangChain, BioBERT, and ChromaDB over **20,000+ research articles**; earned **Best Paper (1st Place)** at IEEE SSD 2026, Italy.

Synthetic Data Generation for Rare Event Prediction IEEE RECCAP 2026

- Developed a **CTGAN + LLM** synthetic-data pipeline with semantic validation, improving minority-class **F1-score from 0.09 to 0.29**; presented at IIT Palakkad.
